

KoloTree has been established as an IT service provider company, founded on the flat management organization, with goal to provide an unique team as a service. Company consists of experienced software engineers (5+ years in telecommunication, electrical distribution systems, systems integration, home automation industry, etc.) and we are offering following services as a team:

- systems integration through web services (SOAP and REST) or using messaging (JMS)
- development of desktop, mobile or web based application (C#, Java or Scala)
- development of reactive systems (responsive, resilient, elastic and message driven)
- migration of existing legacy solution to the modern and well proven technologies
- guidance for improvement of software and processes related to software development

Company Strategy

- **Purpose** - Make customers stress free for digitalizing their business
- **Vision** - To provide quality and maintainable service that exceeds expectations of our customers and to become central gear wheel in customers company
- **Mission Statement** - Quality first
- **Core Values**
 - Quality - Quality comes first. Reduce scope, never quality!
 - Honest - Trust and transparency is something that we are proud of inside our company and toward our clients
 - Flexible - Be agile, look wide
 - Effective - Working hard and smart
 - Teamwork - divide tasks and multiples the success
 - Improvement - Finding the way to improve your business
 - Pragmatic - Not just talking about challenge, deal with it
- **Goals** - Become golden partner to our customers and create innovative and challenging product
